Nulliparous
Late Age at Reproduction
Fewer Pregnancies
Failure to induce lobular differentiation
At Risk Tissue
Oxidative Stress
AGE
Radiation
Estrogen
Cell Division
Stem Cells
DNA damage
4OH Adducts
Metabolism 2OH/16OH
Aromatase
E1/E2/E3
Prenatal Risk Factors
Loss of Adhesion
ETOH
Failure of repair of DNA
Sulfatase
Enterohepatic Circulation
Immortalization
Failure of Apoptosis
Inflammation
Breast Cancer
